Paprasta (greita) paieška atliekama įrašius reikšminius žodžius į paieškos laukelį. Atliekant greitą paiešką paprastai gaunama labai daug rezultatų.

Gautus rezultatus galima surikiuoti pagal (Sort By) tinkamumą (Relevancy), straipsnio pavadinimą abėcėlės tvarka (Title A-Z), datą (Date), autorių (Author).

Search help

Exact match supported for author search results

You can perform an exact author search by enclosing the name (first and/or last) of the author in quotation marks.

Boolean operators

The Boolean operators AND, OR, and NOT can be applied to search terms.

AND (also + or &)

Use AND to search for documents containing two or more terms. For example, the following query returns documents containing both cat and dog:

cat AND dog

The AND operator is applied by default; for example cat AND dog produces the same results as cat dog.

OR

Use OR to search for documents containing at least one of two or more terms. For example, the following query returns documents containing dog, and documents containing cat and dog:

cat OR dog

NOT

Use NOT to search for documents that do not contain a given term. For example, the following query returns documents containing dog, but not containing cat:

cat NOT dog

Paieška naudojant Boolean jungtukus (**AND, OR, NOT**).

Paieškos rezultatus galite filtruoti pagal pavadinimą, autorių, reikšminius žodžius ir publikavimo datą.

Išplėstinė ir citavimo paieška (Advanced and citation search) – naudojama norint susiaurinti paieškos rezultatų skaičių, panaudojant keletą paieškos laukelių, loginius jungtukus.

ABSTRACT

This paper used eight factors to evaluate the land suitability for ecotourism of Okomu National Park (ONP), Nigeria, and Pendjari National Park (PNP), Benin. Poor ecotourism planning could cause irreversible loss of extensive vegetation areas. Therefore, ecotourism experts' responses through analytic hierarchy process (AHP) and geographic information systems were employed to calculate the criteria evaluation weights. The AHP results showed that the maximum and minimum weights of the criteria are the land use/land cover and aspect, respectively, in ONP, while the visibility and aspect, respectively, in PNP. Large areas of ONP were classified as unsuitable, while that of PNP were classified as moderately suitable. However, the land suitability models for ecotourism will serve a dual-purpose of effective park planning and value-added game viewing.

Abbreviation: LSMs: Land Suitability Models

KEYWORDS: LSMs, ecotourism, national parks, park planning, suitability evaluation
